## WASHROOM HYGIENE

### Unique Connect Technology

**phs** Connect is an innovative feature which allows the back plate and electrical connection to be installed separately to the main dryer unit. Once installed the dryer is easily, quickly and securely locked onto the back plate.

For refurbishments or new build sites, this allows the back plate and electrical connection to be installed at first fix, and the actual dryer unit to be installed later. It also allows any non- electrically qualified person to exchange in the unlikely event of a failure.
